## Senior Consultant / Rail Operations Planning, New Jersey

Job-ID: EC01524  
Region: Jersey City, New Jersey / US

### Railways for the world of tomorrow!

DB Engineering & Consulting (DB E&C) is a part of the **DB group**, a world leading global railway company with an extensive organization in Germany and projects around the world. Our company offers technically sophisticated and customized infrastructure, mobility and transport solutions. With our sustainable concepts, gained from our experience in project work for decades, we ensure the future success of economic regions, make important contributions to the protection of the environment and help shape the world of the future. We represent **180 years of rail experience** and our infrastructure projects connect continents. We set the standard for transportation and modern mobility.

We are seeking an innovative and experienced **Senior Consultant / Rail Operations Planning** for our Rail Planning Group, who will be responsible for delivering projects, executing of specialty project tasks, and project acquisition in North America with focus on rail operations planning. The position provides you with many opportunities to demonstrate how your unique skill-set can enhance our projects. You will be part of an innovative team, contributing to the modernization of rail systems in North America and reporting to a Principal Consultant. It requires a highly responsible and accountable individual who communicates clearly, efficiently and proactively. The job opening is located at our office in Jersey City, New Jersey / US, and offers exciting challenges and potential for career growth.

### Your responsibilities:

- Deliver consulting projects
  - Act as the Project Manager and ensure quality, cost, and timely delivery
  - Refine, present and implement project methodologies
  - Instruct and supervise Project Engineers on the project
  - Interface with clients, project stakeholders, and partner firms
  - Report project status, incl. budget and project schedule, to Principal Consultant
- Execute specialty project tasks, depending on your unique skills
  - Perform project tasks that fall into the individual's area of expertise
  - Ensure quality, budget and timely delivery of assigned project tasks
- Acquire projects in North America
  - Develop and maintain strong client relationships
  - Monitor clients' RFPs and actively identify opportunities throughout the project
  - Prepare proposals and pursuits, including the development of project methodologies, budgets and schedules
