

DB Engineering & Consulting GmbH

Infrastructure Safety Officer (m/f)

Job-ID: EC01722
Region: Near/Middle East

DB Engineering & Consulting offers technically sophisticated and customized infrastructure, mobility and transport solutions. With our sustainable concepts, gained from our experience in project work for decades, we ensure the future success of economic regions, make important contributions to the protection of the environment and help shape the world of the future.

For our Joint Venture in the Middle East, Mirfa (Western Region Abu Dhabi), we are seeking an Infrastructure Safety Officer (m/f) who has profound experience within the Deutsche Bahn AG.

The Etihad Rail DB OHS department responsible for ensuring the provision, maintenance, implementation and compliance with OHS standards within the Infrastructure and Operations departments, to protect the company's people, assets, safety certification and legal OHS responsibilities. Ensure compliance with our defined OHS objectives, standards and safety performance and business plan targets through programs that inform, educate and support a culture of 'safety first' in everything that the company does.

The job comprehends the following tasks:

- Develop, implement, maintain, review and continually improve the application within the ERDB Infrastructure department, of the company OHSAS 18001 Health & Safety Management System.
- Ensure the company's OHS Policy is fully implemented to meet the continued needs of the business.
- Develop, implement and monitor leading and lagging safety Key Performance Indicators and provide professional services to the Infrastructure and Operations Directors for the achievement of defined objectives and continual improvement in OHS performance
- Describe and implement health, safety improvement programs to anticipate and manage health, safety risks based on the company's risk profile. Ensure OHS risks arising from Etihad Rail DB activities and processes are managed in a controlled manner, as a minimum to ALARP and where practicable to SOFARP.
- Develop and deliver the company annual OHS plan within defined timescale.
- Organize and carry out safety inspections and audits to meet legislative and safety management system requirements.
- Support the Infrastructure and Operations department to develop emergency and incident response and ensure these plans are established, implemented, maintained and reviewed.
- Ensure a safety first culture exists at all levels within the business through education and awareness / measurement and the audit plan to drive rail safety and environmental performance is to the highest standards (i.e. accidents/incidents and personal injuries).
- Ensure that the Chief Operating Officer, Infrastructure and Operations function maintains the competence of safety critical personnel through implementation and application of the company competence management system.
- Establish OHS standards and procedures against industry best practice and ensure compliance with them.
- Ensure maintenance related incidents are investigated for the purpose of identifying root cause and monitoring implementation of rectification plans.
