

DB Engineering & Consulting USA Inc.

Commercial Project Controller, Irvine / California

Job-ID: EC01761
Region: Irvine/California

Railways for the world of tomorrow!

DB Engineering & Consulting (DB E&C) is a part of the **DB group**, a world leading global railway company with an extensive organization in Germany and projects around the world. Our company offers technically sophisticated and customized infrastructure, mobility and transport solutions. With our sustainable concepts, gained from our experience in project work for decades, we ensure the future success of economic regions, make important contributions to the protection of the environment and help shape the world of the future. We represent **180 years of rail experience** and our infrastructure projects connect continents. We set the standard for transportation and modern mobility.

We are seeking a **Commercial Project Controller (CPC) as a part of our Engineering Financial Operations Team**. In your role, you will be providing high-level accounting transaction skills and financial analysis on a portfolio of projects through their life cycle. You will need to thoroughly understand the financial components of a project and proactively work with Executive Management, Project Managers and various team members. The position requires you to monitor, analyze and disseminate details related to the project and its actual vs planned performance. The job opening is located in Irvine, and offers exciting challenges and potential for career growth. This role reports directly to the Chief Financial Officer (CFO) in Sacramento.

Your responsibilities:

- Review project contracts with a clear understanding of all contract terms and conditions, project types, scope of work and invoicing requirements
- Ensure the accuracy of the cost and pricing calculations
- Verify subcontractor agreements are issued and created in accordance with the terms stipulated in the master contract
- Accurately set up projects and job cost reporting structure within DB E&C systems utilizing GAAP guidelines and associated terms and conditions of the specific contracts
- Monitor and control project and subcontractor scope including schedule, budget, risks and contract deliverables in collaboration with various project managers and team members
- Identify financial and contract issues before project profit erosion occurs and assist with the development of a corrective action plan, if needed
- Review and analyze actual vs planned financial performance and disseminate that information to appropriate managers and team members
- Responsible for project cost reconciliations
- Prepare monthly project billings and reports
- Support generation and posting of journal entries to the general ledger
- Manage timely completion of multiple and recurring assignments
- Other general accounting, finance and company structure tasks

DB Engineering & Consulting USA Inc.
