

DB Engineering & Consulting GmbH

Systems Engineer (f/m/d)

Job-ID: EC01868
Region: Israel

DB Engineering & Consulting offers technically sophisticated and customized infrastructure, mobility and transport solutions. With our sustainable concepts, gained from our experience in project work for decades, we ensure the future success of economic regions, make important contributions to the protection of the environment and help shape the world of the future.

The red line will be the first section of a Light rail system in the Tel Aviv metropolitan area, known as Tel Aviv Light Rail. The line will run from Bat Yam in the south to Petah Tikva in the northeast with a significant portion of it underground. The line is planned to be completed in October 2021. Initial construction started in 2007. DB E&C has been awarded to be the partner for system integration in the Red Line light rail project. Additionally, DB E&C will provide interface management service during the construction of the line.

For this project in Tel Aviv, we are looking for a Systems Engineer. Your tasks will be as follows:

- Supervise and coordinate all system interface activities and contractors
- Overview of all system interfaces; this includes underground stations
- Arrange, prepare, lead/assist and conduct system integration meetings between different contractors and all related parties
- Contributes on a regularly basis interface reports to Interface Manager
- Checks and supervises all the tasks related to system integration issues
- Identifies critical design issues and recommends solutions
- Leading regularly system integration meetings
- Supporting the decision making process of the client's engineer

Your Profile:

- University degree (B. Sc. or M.Sc.) in Electrical or Mechanical Engineering
- MRT/ LRT/ metro systems knowledge needed
- At least 10 years' experience as a railway engineer
- Willingness to re-locate to Israel for at least two years
- Very good English skills
- Willingness to relocate to Tel Aviv, Israel for at least 1 year
